

VIRTUAL OPS CENTER DRIVES BETTER DECISIONS

Enhance situational awareness with a portable, Augmented Reality (AR) command-and-control center application. First responders can interact with intuitive, holographic data for actionable insights and quick response.

REAL-TIME

Show critical information live

INTEGRATED

Combine multiple data sources

MOBILE

Deploy EOC anytime, anywhere

CONTEXTUAL

See data where and when it matters

Make Data User-Friendly

AROC enables complex information to be easily understood. Everyone can get on the same page sooner, reducing the time and energy to address the emergency at hand.

Accelerate Awareness

- Train personnel to see the big picture
- Triage with less mental fatigue
- Monitor incidents effortlessly
- Empower effective teamwork
